The authors would like to thank the Walton Family Foundation for its support of this project. We would like to thank James Lanich, Dave Johnston and the Educational Results Partnership for providing the data for the schools analysis. Also, we would like to thank Laura Waters for peer-reviewing the draft of this study. Any errors or omissions are the sole responsibility of the authors. The authors would like to thank PRI senior vice president Rowena Itchon for overseeing the copyediting and marketing of the study. In addition, the authors would like to thank graphics designer Dana Beigel for her excellent layout of this study. The authors would like to acknowledge the contributions of Sally Pipes, president and CEO of PRI, and the rest of the dedicated staff of PRI. Finally, the authors would like to acknowledge the efforts of Chrissie Dong, formerly a member of PRI's development department, and Laura Dannerbeck, former marketing consultant for PRI and now director of events and marketing for PRI. The authors of this study have worked independently and their views and conclusions do not necessarily represent those of the board, supporters, or staff of PRI.

Executive Summary

Are regular New Jersey public schools with predominantly non-low-income student populations performing well? Lots of middle-class parents think so and believe that education problems are limited to places such as inner-city Newark. Yet, based on a variety of indicators, many of these schools may not be as good as parents think they are.

On the National Assessment for Educational Progress (NAEP), often referred to as the nation's report card, many non-low-income New Jersey students fail to perform at the targeted proficient level:

- On the 2015 NAEP fourth-grade reading test, 43 percent of non-low-income New Jersey test-takers failed to score at proficient level.
- On the NAEP fourth-grade math test, 38 percent of non-low-income New Jersey students failed to score at the proficient level.
- On the 2015 NAEP eighth-grade reading exam, 49 percent of non-low-income New Jersey test-takers, roughly half, failed to score at the proficient level.
- On the NAEP eighth-grade math exam, 42 percent of non-low-income New Jersey test-takers failed to score at the proficient level.

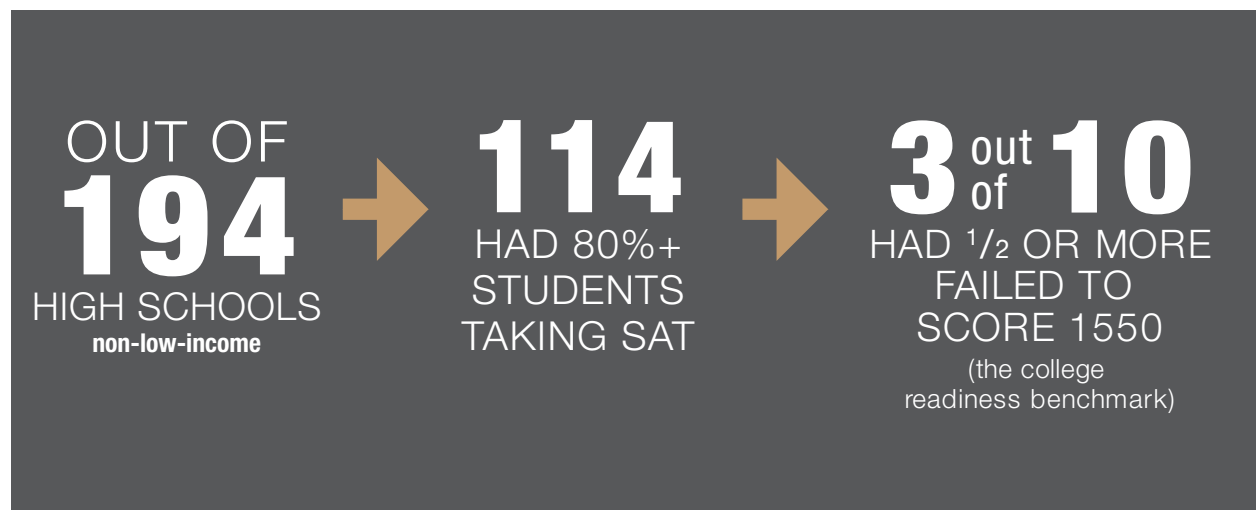

Non-low-income New Jersey students also have lower proficiency rates on the NAEP compared to similar students in top-performing states such as Massachusetts.

Prior to the new multi-state Common Core-aligned Partnership for Assessment of Readiness for College and Careers (PARCC) exam, the state-administered exams in New Jersey in 2014 were the New Jersey Assessment of Skills and Knowledge (NJ ASK), which was used in grades 3-8, and the High School Proficiency Assessment (HSPA), which was administered in grade 11. This study uses scores on the NJ ASK and HSPA to analyze school performance.

In New Jersey, there are 1,170 regular public schools where 33 percent or fewer of their students were classified as low income, i.e. schools with predominantly non-low-income student populations. Among these schools, only 47, or 4 percent, had 50 percent or more of their students in at least one grade level failing to meet or exceed proficiency on the 2014 NJ ASK and HSPA. These numbers, however, are not necessarily indicative of high performance among this set of schools, since, as *The New York Times* has pointed out, the NJ ASK and HSPA were “easier tests.”

Because the NJ ASK and HSPA are not rigorous exams, and therefore produce inflated proficiency rates not in line with state proficiency rates on rigorous tests such as NAEP, this study also reviewed SAT data for regular public high schools with predominantly non-low-income student populations.

In 2014, there were 194 public high schools in New Jersey that had predominantly non-low-income student populations. Of these 194 schools, 114 met the state target of 80 percent or more of seniors taking the SAT. Out of these 114 schools, 32 schools -- 28 percent or nearly three out of 10 -- had half or more of their SAT takers fail to score at or above the college readiness benchmark score of 1550. Thus, according to the SAT data, a significant proportion of predominantly non-low-income New Jersey high schools were not preparing at least half or more of their students for likely success in higher education.

Many schools with more than 50 percent of their SAT test takers failing to score at or above the college-readiness benchmark are in middle-class or more affluent neighborhoods across New Jersey.

At Waldwick High School in Bergen County, only 1 percent of the school's students were classified as economically disadvantaged in 2014. Ninety-three percent of seniors took the SAT in 2014, and 56 percent of these test takers failed to score at or above the college-readiness benchmark of 1550.

Other predominantly middle-class regular public high schools with college-readiness problems include, but are not limited to:

- Emerson High School in Bergen County
- Hasbrouck Heights High School in Bergen County
- Cedar Grove High School in Essex County
- Shore Regional High School in Monmouth County
- Jefferson Township High School in Morris County
- Pompton Lakes High School in Passaic County
- Arthur L. Johnson High School in Union County
- Jonathan Dayton High School in Union County

These results should cause middle-class New Jersey parents to re-think their views on the quality of their neighborhood public schools, and, consequently, to open their minds to other education options, choices and policy changes that would allow their children to escape underperforming schools and attend better-performing alternatives. Among these alternatives are a variety of types of school-choice programs that other states have enacted:

- Illinois has enacted a universal tax-credit program that allows individuals to claim tax credits for educational expenses, such as private-school tuition.
- Arizona gives a dollar-for-dollar tax credit to taxpayers who contribute to scholarship tuition organizations that provide students with private-school scholarships. All Arizona K-12 students, regardless of income, are eligible to apply for the scholarships.
- Nevada has enacted a groundbreaking law making education savings accounts (ESAs) available to all parents and their children. The state will deposit funding into ESAs that parents can use for private-school tuition, online education, tutoring or other education services.

Increased choice for parents of all income levels should be the guiding principle for New Jersey policymakers. Choice is a right for all, not just for some.

Introduction and Background on “Not As Good As You Think” Research

In 2007, the Pacific Research Institute (PRI) published a landmark book entitled *Not as Good as You Think: Why the Middle Class Needs School Choice*. The book examined student performance on California math and English exams in the state’s public schools that had relatively few low-income students. The book found that hundreds of these public schools were underperforming based on the California Standards Test (CST). In 2009, PRI published a follow-up study entitled “Still Not as Good as You Think: Why the Middle Class Needs School Choice.” This current study examines schools with similar student populations in New Jersey to discover whether the same phenomenon is occurring.

In the 2007 PRI book, the authors examined the pool of schools in California where a third or fewer of the students at the school were eligible for the National School Lunch Program (NSLP), which is the federal program that provides free or reduced-priced lunches to students. Participation in the NSLP program is often used as a proxy for student socio-economic status. Children from families with incomes at or below 130 percent of the poverty level are eligible for free meals, and those from families with incomes between 130 percent and 185 percent of the poverty level are eligible for reduced-price meals. If only a third or fewer of the students at a school were eligible for the NSLP program, one could reasonably conclude that predominantly non-low-income or non-economically-disadvantaged students attended the school.

Using the benchmark of one-third or fewer students eligible for the NSLP is a very conservative categorization. For example, a study by the Third Way think tank attempted to examine the student achievement at middle-class public schools around the country. The study used a broad definition of “middle class” -- “Those with between 26 percent and 75 percent eligibility [for the NSLP] represent our target middle-class schools.”¹ The study’s authors, however, acknowledged some problems with the wide net that they cast: “There are some characteristics in which the schools with 51-75 percent of their student population eligible for the NSLP look more like lower-income schools than middle-class schools.”² Given such an admission, our more conservative approach seems prudent.

Within the pool of public schools with one-third or fewer students eligible for the NSLP program, PRI’s 2007 book then examined the performance on the state-standards-aligned California Standards Test (CST) in mathematics and English. California had set grading benchmarks of advanced, proficient, basic, below basic, and far below basic. It was the state’s goal that all students score at least at the proficient level on the CST. The authors then reviewed the test results from the pool of predominantly non-low-income schools and determined how many schools had more than 50 percent of students performing below proficiency in at least one grade level on either the CST math or English exam. For this result to occur, even if every low-income student in a grade level at a school performed below the proficient mark on a grade-level test, a significant percentage of non-low-income students also had to perform below proficiency.

Based on these criteria, the 2007 book found almost 300 public schools in California with predominantly non-low-income student populations where more than half of the students in at least one grade level failed to reach proficiency in either math or English on the state exam.

This current study uses the 33/50 criteria and applies it to regular public schools in New Jersey.³ The New Jersey Department of Education equates “economic disadvantaged” status with eligibility for the National School Lunch Program.⁴

In addition to the 33/50 criteria, this study also analyzes national test results for New Jersey, plus SAT results at New Jersey regular public high schools with predominantly non-low-income student populations.

Performance of New Jersey Students on the National Assessment of Educational Progress

There are several ways to address the question of how well non-low-income students in New Jersey are performing. To get a big picture of the achievement of New Jersey’s non-low-income students, one of the first places to which researchers turn is to the state’s results on the National Assessment of Educational Progress (NAEP).

Often referred to as the nation’s report card, the NAEP exams are used in virtually all states and test students periodically in several subjects:

Students are tested in a variety of different subject areas and grade levels, and they are scored as either achieving advanced, proficiency, basic or below basic in a specific subject. The Commissioner of Education Statistics, under the U.S. Department of Education, is responsible for overseeing the NAEP. The National Assessment Governing Board, an independent, bipartisan board appointed by the Secretary of Education, is responsible for determining the framework and assessments given. The Board also defines basic, proficient, and advanced levels for each grade.

Achieving 100 percent proficiency on NAEP exams is a goal that all schools should be striving for.⁵

In defining “proficiency,” the U.S. Department of Education states: “This level represents solid performance for each grade assessed,” and that students reaching the proficient level “have demonstrated competency over challenging subject matter, including subject matter knowledge, application of such knowledge to real world situations, and analytical skills appropriate to the subject matter.”⁶ In contrast, to achieve a “basic” level, a student need display only partial mastery of requisite knowledge and skills that are fundamental for proficient work at that grade level. New Jersey, like most other states, participates in NAEP testing.

Paul Peterson of Harvard University and Fredrick Hess of the American Enterprise Institute (AEI) have written that the difficulty level of NAEP’s test items and its definition of “proficiency” have been judged to be on par with the standards used by designers of international tests of student achievement. “Proficiency,” they conclude, “has acquired roughly the same meaning in Europe and Asia, and in the United States—as long as the NAEP standard is employed.”⁷

NAEP uses matrix sampling, a testing technique that assembles different assessment documents covering different aspects of a subject. These different assessments are administered to different sample sets of students. In other words, on the NAEP reading exam not every student answers the same questions. Aggregate scores for all students are then calculated.⁸

Since NAEP uses matrix sampling, it is impossible to compare scores between students or between schools. This situation is unlike state tests, such as the New Jersey Assessment of Skills and Knowledge (NJ ASK) and the High School Proficiency Assessment (HSPA), which allow for such comparisons, since all students in a given grade level take the same test and answer the same questions. NAEP produces statewide data and allows for comparisons of performance between states and gives a picture of statewide student performance.

The most recent NAEP results show that New Jersey has not only failed to come close to the 100-percent proficiency goal for all students, many non-low-income students, who are often assumed to be higher achieving, are also failing to achieve proficiency in the core subjects.

NAEP scores can be broken down into various group categories, including by participation and non-participation in the NSLP. It turns out that not only are many non-low-income New Jersey students failing to achieve proficiency in reading and math on the NAEP exams, higher proportions of non-low-income New Jersey students failed to achieve proficiency on most of the 2015 exams compared to the proportions achieving proficiency on the 2013 exams.

On the 2015 NAEP fourth-grade reading exam, 43 percent of New Jersey students not eligible for the NSLP failed to score at the proficient level, which was a slight dip versus the 44 percent of New Jersey fourth graders who failed to achieve proficiency on the 2013 NAEP reading exam.⁹ However, on all other 2015 exams, the proportion of non-low-income New Jersey students failing to achieve proficiency was higher than the proportions in 2013.

On the 2015 NAEP eighth-grade math exam, 42 percent of non-low-income New Jersey students failed to score at or above the proficient level.

On the 2015 NAEP fourth-grade math exam, 38 percent of non-low-income New Jersey students failed to score at or above the proficient mark, which is an increase over the 35 percent of fourth graders failing to achieve proficiency on the 2013 NAEP reading exam.¹⁰

On the 2015 NAEP eighth-grade reading exam, virtually half, 49 percent, of non-low-income New Jersey students failed to score at or above the proficient level, which is a significant increase over the 43 percent of non-low-income eighth graders who failed to hit the proficiency benchmark on the 2013 NAEP reading exam.¹¹

On the 2015 NAEP eighth-grade math exam, 42 percent of non-low-income New Jersey students failed to score at or above the proficient level, which is an increase over the 40 percent of non-low-income eighth graders who failed to achieve proficiency on the 2013 NAEP math exam.¹²

Not only has the achievement level of non-low-income students in New Jersey failed to approach the 100-percent proficiency goal, it also compares unfavorably with the performance of similar students in a state like Massachusetts, which is a leader in NAEP performance.

On the 2015 NAEP fourth-grade math exam, 29 percent of non-low-income students in Massachusetts failed to reach proficiency versus 38 percent in New Jersey.¹³ On the fourth-grade reading exam, 35 percent of Massachusetts non-low-income test-takers failed to hit proficiency, while 43 percent of non-low-income New Jersey test-takers failed to do so.¹⁴ There were similar disparities on the eighth-grade NAEP exams.

On the 2015 eighth-grade NAEP math exam, 34 percent of non-low-income students in Massachusetts failed to hit the proficiency mark, while 42 percent of non-low-income New Jersey eighth-graders failed to

achieve proficiency.¹⁵ On the eighth-grade reading exam, 41 percent of non-low-income students in Massachusetts failed to score at the proficient level, while 49 percent of non-low-income New Jersey students failed to achieve proficiency.¹⁶

Thus, not only are significant proportions of non-NSLP-eligible New Jersey students failing to achieve proficiency on NAEP exams, they are failing to achieve proficiency at the rate of their peers in higher-performing states like Massachusetts. The achievement issues of many non-low-income New Jersey students on the NAEP should be borne in mind when reviewing their scores on New Jersey's state exams.

New Jersey Standards and Tests

Any discussion of state testing must first start with an examination of the rigor of a state's subject-matter standards. States with challenging and rigorous subject-matter standards will usually have rigorous tests since state tests are aligned with state standards. Thus, prior to the advent of the national Common Core education standards, states such as California and Massachusetts had their own rigorous individual state standards, plus standards-aligned tests that also were considered rigorous. In New Jersey, the state's pre-Common Core state standards received mediocre reviews.

The Thomas B. Fordham Institute has been grading state subject-matter standards for years. In its 2010 report on state standards, Fordham gave California an "A" and Massachusetts an "A-" for their English-language-arts (ELA) standards. New Jersey's ELA standards, however, received a much lower "C" grade. According to the Fordham Institute report:

In New Jersey, the state's pre-Common Core state standards received mediocre reviews.

New Jersey's [ELA] standards exhibit some strengths in key areas, such as reading, but enough problems exist in content coverage of other areas, as well as in overall clarity and specificity, that the standards on balance are rather mediocre.¹⁷

The group's report also noted that the state's ELA standards "leave at least 35 percent of essential content missing."¹⁸

New Jersey's math standards were equally mediocre, earning a "C" grade as well. In comparison, California's state math standards received an "A+," while Massachusetts received a "B+" for its math standards. In its evaluation, the Fordham reviewers concluded:

New Jersey's [math] standards are extremely difficult to read and understand. They are presented in several different documents and, within each presentation, the organization is complex, making them difficult to follow. Arithmetic is moderately prioritized, but its development is inadequate. High school content is reasonably well covered, but it is presented in several different documents, with some STEM-ready material missing.¹⁹

The New Jersey State Board of Education adopted the national Common Core State Standards in math and English in 2010. The New Jersey state test in grades three through eight in 2014 was the New Jersey Assessment of Skills and Knowledge (NJ ASK). Various versions of NJ ASK have been used in New Jersey since 2003. The 2014 NJ ASK was viewed by the New Jersey Department of Education as a transitional exam, since the multi-state Common Core-aligned exam would not debut until 2015:

The 2014 NJ ASK will measure the Common Core State Standards (CCSS) within the current NJ ASK blueprint. The NJ ASK assessments are called “transitional” because we will not be able to measure the full range of the CCSS until the next generation assessments are developed and administered. New Jersey is a Governing state in the Partnership for Assessment of Readiness for College and Careers (PARCC).²⁰

In 2015, New Jersey used the PARCC test, which is the multi-state Common Core-aligned exam. Significant numbers of New Jersey students decided not to take the PARCC exams, with reports of up to 15 percent of eleventh graders opting out.

In 2015, New Jersey used the PARCC test, which is the multi-state Common Core-aligned exam. There has been controversy over the PARCC exam in New Jersey, with opposition in the legislature and criticism of the Common Core standards by Governor Chris Christie. Despite these misgivings, the PARCC tests were administered in March 2015, and the results were released at the end of October 2015. Significant numbers of New Jersey students decided not to take the PARCC exams, with reports of up to 15 percent of eleventh graders opting out.²¹ Because of the opting-out problem and the fact that the 2015 PARCC scores came out too late to be used and analyzed for this study, the authors have used the results of the 2014 NJ ASK and HPSA to analyze the performance of predominantly non-low-income public schools.

The NJ ASK is scored on a scale of up to 300 points. There are three performance levels: advanced, proficient and partially proficient. According to the New Jersey Department of Education, the scale scores for each performance level are:

Advanced proficient	250-300
Proficient	200-249
Partially proficient	100-199 ²²

The Department says, “Partially proficient is considered to be below the state minimum level of proficiency.” Thus, “Students at this proficiency level may need additional instructional support, which could be in the form of individual or programmatic intervention.”²³ Overall, the Department states:

- Scores indicative of Advanced Proficient performance reflect performance that has clearly met or exceeded state standards. It is rare for students falling in this range to be in need of instructional intervention.
- Scores indicative of Proficient performance reflect performance that generally has met the state standards. It is typically true that students falling in this range are not in need of instructional intervention, but one may wish to look more closely at students whose scores approach the lower end of this distribution to confirm that instructional intervention is in fact not needed.
- Scores indicative of Partially Proficient performance reflect performance that has not met the state standards. Students falling into this range are most likely to be in need of instructional support, particularly those lower in the range.²⁴

At the high-school level, New Jersey uses the High School Proficiency Assessment (HSPA), which is a standards-based graduation test that eleventh-grade students take for the first time in March of their junior year. The HPSA was first administered in 2002.

Like the NJ ASK, the HSPA is scored on a 100 to 300 scale, with the same cut points for the three levels of performance. The definitions of the performance levels are also similar.²⁵ And also like NJ ASK, the HPSA is a transitional exam, with respect to the Common Core standards and multi-state PARCC test.

Analysis of Individual New Jersey Public Schools

The 33/50 Schools

As was mentioned previously, while NAEP scores are useful in giving a big-picture statewide check on student achievement, state test results are the usual measure of individual school performance.

This study employs a methodology used in the 2007 PRI *Not as Good as You Think* book, which focused on public schools with 33 percent or fewer of students on the National School Lunch Program (NSLP) and 50 percent or more of students in at least one grade level that failed to achieve proficiency on the state tests. In view of the inflated proficiency rates on the 2014 New Jersey state reading and math exams, vis-à-vis New Jersey's proficiency rates on the NAEP, it is not surprising that relatively few schools have 50 percent or more of their students in at least one grade level failing to reach proficiency on either state subject-matter test.

In fact, out of the 1,170 predominantly non-low-income regular public schools in New Jersey, only 47 schools had at least one grade level with 50 percent or more of their students failing to achieve proficiency in reading or math. Thus, only 4 percent of the state's predominantly non-low-income regular public schools fell into the underperforming category, even though, for example, half of non-low-income New Jersey eighth graders failed to achieve proficiency in reading on the 2015 NAEP exam.

Also, in comparison, Colorado, which has roughly similar NAEP scores to New Jersey, has significant numbers of schools that underperform on its own state tests. A September 2015 Pacific Research Institute study of "not as good as you think" schools in Colorado found that more than one in five public schools with predominantly non-low-income student populations had at least one grade level with 50 percent or more of students failing to achieve proficiency in reading or math on the 2014 Colorado state test. Further, among predominantly non-low-income public high schools in Colorado, 75 percent had at least one grade level with 50 percent or more of students failing to achieve proficiency in either reading or math.²⁶ Although Colorado's state tests are not as rigorous as the NAEP, they appear to be more rigorous than the NJ ASK and the HPSA.

In addition, even though the 2015 PARCC test results came out too late to be used and analyzed in this study, the aggregate numbers underscore the likely inflated proficiency rates on the NJ ASK and HSPA. Looking at all New Jersey students in 2015, less than half of students at every grade level scored at the proficient level in math on the PARCC, whereas 74 percent of 2014 NJ ASK test-takers and 85 percent of HPSA test takers scored at or above the proficient level in math. There were similar disparities in English. Comparing results on the PARCC with those on the NJ ASK and HPSA, *The New York Times* notes, "In previous years, on easier tests, New Jersey students fared significantly better."²⁷

Because the 2014 New Jersey state tests likely fail to find underperformance problems at many schools, analyses of high-school SAT data will be used later in the paper.

While the 2014 New Jersey state exams likely under-detect low-performing non-low-income public schools, it is worth noting a few examples of schools that did meet the 33/50 underperformance criteria of this study.

Bertram F. Gibbs Elementary School is located in New Milford in Bergen County. Just 12 percent of the school's students were classified as socio-economically disadvantaged in 2014.

Bertram F. Gibbs serves pre-K to fifth-grade students. On the fourth-grade NJ ASK reading exam, 54 percent of the school's students failed to achieve at or above the proficient level.

Memorial Elementary School is in Pitman in Gloucester County. One out of four students, 25 percent, was classified as socio-economically disadvantaged in 2014.

Memorial serves students in pre-K to fifth grade. On the NJ ASK reading exam in grades three, four and five, more than half of students taking those exams failed to score at or above the proficient level.

Also in Gloucester County is Woodbury Heights Elementary School in Woodbury Heights. About two in 10 students, 21 percent, were classified as socio-economically disadvantaged in 2014.

Woodbury Heights Elementary serves pre-K to sixth-grade students. Half or more of students taking the fourth and fifth-grade 2014 NJ ASK reading exams failed to score at or above the proficient level.

Franklin Township Elementary School is in Franklin Township in Hunterdon County. Only a miniscule 3 percent of students were classified as socio-economically disadvantaged in 2014.

Franklin Township Elementary serves students in pre-K to grade eight. On the fourth-grade NJ ASK reading exam, roughly six out of 10 students failed to score at or above the proficient level.

Valley Road School is in Stanhope in Sussex County. Seventeen percent of the school's students were classified as socio-economically disadvantaged in 2014.

Valley Road serves students in pre-K to grade eight. Students in the middle-school grades had difficulties in math. Half or more of students in grades seven and eight failed to score at or above the proficient level on the 2014 NJ ASK math exams.

As mentioned previously, in view of the proficiency disparities between New Jersey's NAEP and state test results, these few examples of schools with half or more of their students failing to achieve proficiency on a grade-level state exam may be the tip of the iceberg in terms of proficiency underperformance among predominantly non-low-income New Jersey public schools.

The SAT and New Jersey High Schools

One other measure of student performance, at least at the high-school level, is the SAT, the college admissions test administered by the College Board. SAT scores are used by thousands of institutions of higher education to evaluate the college-readiness of applicants.

According to the College Board, the SAT “tests what you know and how well you can apply that knowledge.”²⁸ Specifically, the College Board says:

The SAT doesn’t test logic or abstract reasoning. It tests the skills you’re learning in school: reading, writing and math. Your knowledge and skills in these subjects are important for success in college and throughout your life.

- The critical reading section includes reading passages and sentence completions.
- The writing section includes a short essay and multiple-choice question on identifying errors and improving grammar and usage.
- The mathematics section includes questions on arithmetic operations, algebra, geometry, statistics and probability.²⁹

Each section of the SAT (reading, writing and math) is scored on a scale from 200 to 800. Given that there are three sections to the SAT, the total number of points is 2400. In addition, the College Board explains that “if you scored close to the mean or average – about 500 on SAT critical reading and 500 on SAT mathematics – admissions staff would know that you scored as well as about half of the students who took the test nationally.”³⁰ The key scoring target, according to the College Board, is the College and Career Readiness Benchmark, which is set at 1550:

The College Board developed the SAT College and Career Readiness Benchmark to help colleges and secondary school administrators, educators, and policymakers identify students who are likely to be ready to take college-entry, credit-bearing courses in college and not need remediation. The SAT benchmark score of 1550 is associated with a 65 percent probability of obtaining a first-year college GPA of B- or higher.³¹

In addition, the College Board cites studies showing that students meeting the 1550 benchmark are significantly more likely to enroll in a four-year college and earn a bachelor’s degree within four years than students who fail to meet that scoring benchmark.³²

Eight out of 10 New Jersey students – 79.3 percent – in the class of 2014 took the SAT. Less than half – 46.1 percent – scored at or above the 1550 benchmark. It turns out that a significant number of the students who scored below the college-ready benchmark attended predominantly non-low-income high schools.

In discussing the SAT performance of students and high schools, three indicators will be used: 1) the percentage of students taking the SAT (the state of New Jersey’s target is 80 percent), 2) the average SAT score at the school, and 3) the percentage of students failing to score above 1550.

“If you live in New Jersey’s many middle-class suburbs, you most likely take great pride in your public-school district, each one a reflection of distinctive township identities,” observes education writer Laura Waters. In her insightful *NJ Spotlight* article “Are NJ’s High School Diplomas Worth the Paper They’re Printed On?,” Waters reviewed the SAT data on middle-class New Jersey high schools and concluded:

It’s painful, then, to acknowledge that our cherished small-town public schools are not adequately preparing our children for college and careers. But that’s what both data and educational experts are telling us.³³

Thus, according to the SAT, a significant proportion of predominantly non-low-income New Jersey high schools were not preparing at least half or more of their students for likely success in higher education.

In 2014, there were 194 public high schools in New Jersey that had predominantly non-low-income student populations. Of these 194 schools, 114 met the state target of 80 percent or more of seniors taking the SAT. Out of these 114 schools, 32 schools -- 28 percent or nearly three out of 10 -- had half or more of their SAT takers fail to score at or above the college readiness benchmark of 1550. Thus, according to the SAT, a significant proportion of predominantly non-low-income New Jersey high schools were not preparing at least half or more of their students for likely success in higher education.

The following is a discussion of some of the high schools that have high percentages of students failing to reach SAT college readiness, despite low percentages of socio-economically disadvantaged students.

Bergen County

Waldwick High School is in Waldwick, which had a 2013 population of 9,839. NFL player Dave Fiore, who played for the San Francisco 49ers and the Washington Redskins, graduated from Waldwick High.

The median household income of Waldwick in 2013 was \$105,651, which was 50 percent higher than the state median of \$70,169. The 2013 median home value in Waldwick was \$400,978, which was 30 percent higher than the statewide median of \$307,700.³⁴

At Waldwick High in 2014, only a microscopic 1 percent of students were classified as socio-economically disadvantaged. Ninety-three percent of eligible students took the SAT in 2014. However, 56 percent of these test takers failed to score at or above the college-readiness mark of 1550. The schoolwide average was 1525.

Emerson High School is in Emerson in the Pasack Valley. A suburb in the New York metropolitan area, Emerson had a 2013 population of 7,566, which was a 5 percent increase over the population in 2000. The median household income in Emerson in 2013 was \$100,089, which was 43 percent higher than the state median of \$70,169. The 2013 median home value in Emerson was \$451,872, which was 47 percent higher than the statewide median of \$307,700.³⁵

At Emerson High in 2014, only 8 percent of students were classified as socio-economically disadvantaged, and 82 percent of eligible students took the SAT. However, 65 percent of these SAT test-takers failed to score at or above 1550. The schoolwide average SAT score was 1453.

Dumont High School is in Dumont, which had a 2013 population of 17,757. The median household income in Dumont in 2013 was \$86,237, which was 23 percent higher than the statewide median of \$70,169. The 2013 median home value in Emerson was \$361,073, which was 17 percent higher than the statewide median of \$307,700.³⁶

At Dumont High in 2014, just 11 percent of students were classified as socio-economically disadvantaged, and 86 percent of eligible students took the SAT. Yet, 50 percent of these test takers failed to score at or above 1550. The schoolwide average SAT score was 1535.

New Milford High School is in New Milford, which had a 2013 population of 16,572. Famed football player and actor Ed Marinaro is an alumnus of New Milford High.

The median household income in New Milford in 2013 was \$73,502, which was 5 percent higher than the statewide median of \$70,165. The 2013 median home value in New Milford was \$394,038, which was 28 percent higher than the statewide median of \$307,700.³⁷

At New Milford High in 2014, just 11 percent of students were classified as socio-economically disadvantaged. Community reviews of the school are mixed, but one comment by a graduate of New Milford High is telling:

I graduated from NMHS several years ago. . . . I would have been better off home schooling myself. It does not prepare you for college at all. . . . Hopefully, the new teachers that have been hired will inspire some new life in the school. But seeing how SAT and standardized test scores continue to be at the bottom of Bergen County schools, I'm not all that hopeful.³⁸

Indeed, while 91 percent of eligible students took the 2014 SAT, 60 percent of these test takers failed to score at or above 1550. The schoolwide average SAT score was 1479.

North Arlington High School is in the borough of North Arlington, which had a 2013 population of 15,632. The median household income in North Arlington in 2013 was \$75,779, which was 8 percent higher than the statewide median of \$70,165. The 2013 median home value in North Arlington was \$350,952, which was 14 percent higher than the statewide median of \$307,700.³⁹

At North Arlington High in 2014, less than 18 percent of students were classified as socio-economically disadvantaged. Posted community reviews of the school are largely negative. One parent wrote that the school gives students good grades, but that when these students go to college they perform poorly: "students' results in college [are] a disaster."⁴⁰

In light of the parental concern about the college readiness of North Arlington students, it is not surprising to find out that while 83 percent of eligible students took the SAT, a whopping 71 percent of these test takers failed to score at or above 1550. The schoolwide average SAT score was 1420.

Hasbrouck Heights High School is in Hasbrouck Heights, which had a 2013 population of 12,022. Actor Jason Biggs, star of the *American Pie* movie series, legendary entertainer Arthur Godfrey, and Pulitzer Prize-winning columnist William Caldwell attended Hasbrouck Heights High.

The median household income in Hasbrouck Heights in 2013 was \$88,576, which was 26 percent higher than the statewide median of \$70,165. The 2013 median home value in Hasbrouck Heights was \$411,292, which was 34 percent higher than the statewide median of \$307,700.⁴¹

At Hasbrouck Heights High, 17 percent of students were classified as socio-economically disadvantaged in 2014, and 83 percent took the SAT. However, a whopping 61 percent of these test takers failed to score at or above 1550. The schoolwide SAT average score was 1505.

Other predominantly non-low-income high schools in Bergen County that underperformed on the SAT include: Lyndhurst High, Saddle Brook High and Wood Ridge High.

Burlington County

Delran High School is in Delran township, which had a 2010 population of 16,896. Olympic gold-medalist soccer player Carli Lloyd, who in 2015 became the first female player to score three goals in a Women's World Cup Final, attended Delran High.

Twenty-two percent of students at Delran High in 2014 were classified as socio-economically disadvantaged, and 81 percent of eligible students took the SAT. More than two-thirds of these test takers, 68 percent, failed to score at or above 1550. The schoolwide average SAT score was 1454.

Camden County

Haddon Township High School is in Westmont, which is the name given to the downtown area of Haddon Township. In 2010, Haddon Township had a population of 14,707. Well-known thoroughbred horse racing jockey Tony Black graduated from Haddon Township High.

At Haddon Township High in 2014, 14 percent of students were classified as socio-economically disadvantaged, and 94 percent of eligible students took the SAT. Yet, 54 percent of SAT test takers at the school failed to score at or above 1550. The schoolwide average SAT score was 1514.

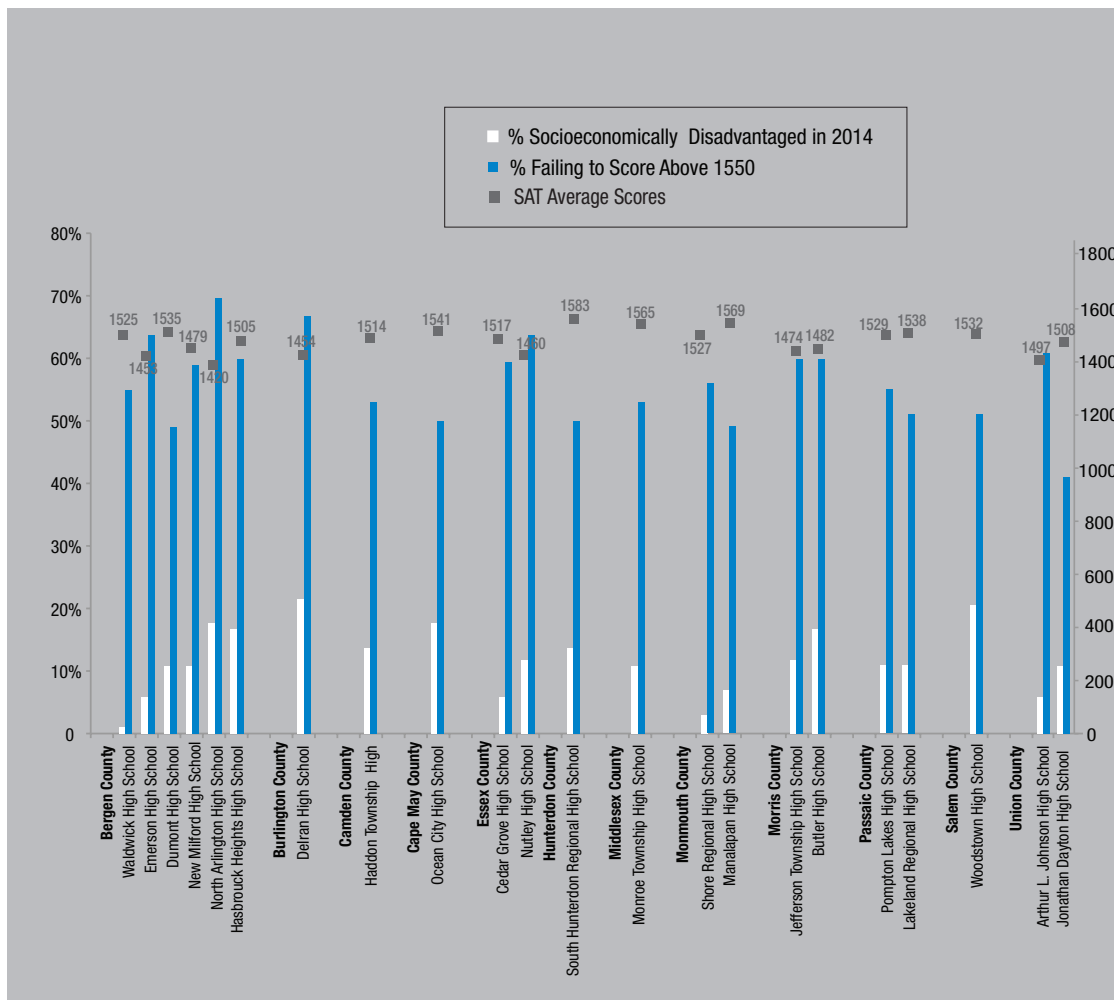

Cape May County

Ocean City High School is located in Ocean City, which had a 2010 population of 11,701. Actress Anne Heche, NFL linebaker Dave Colman and author Gay Talese all attended Ocean City High. The Travel Network named Ocean City's beach as its best family beach in the country, and the high school is located blocks from the Atlantic Ocean.

Eighteen percent of students at Ocean City High, less than two out of 10, were classified as socio-economically disadvantaged in 2014, and 84 percent took the SAT. A majority, 51 percent, of SAT test takers failed to score at or above 1550. The schoolwide average SAT score was 1541.

Essex County

Cedar Grove High School is in Cedar Grove, which had a 2010 population of 12,411. In 2008, Cedar Grove was listed in the top 20 places to live in New Jersey by *New Jersey Monthly*. Amanda Freitag, a celebrity chef often featured on the Food Network, where she is a judge on the show *Chopped*, attended Cedar Grove High.

The median household income in Cedar Grove in 2013 was \$94,069, which was 34 percent higher than the statewide median of \$70,165. The 2013 median home value in Cedar Grove was \$428,352, which was 39 percent higher than the statewide median of \$307,700.⁴²

At Cedar Grove High in 2014, just 6 percent of students were classified as socio-economically disadvantaged, and 87 percent of eligible students took the SAT. Yet, a very sizeable 61 percent of these test takers failed to score at or above 1550. The schoolwide average SAT score was 1517.

Nutley High School is in Nutley, which is eight miles from Newark, and which had 2010 population of 28,370. Homemaking legend Martha Stewart and former U.S. Senator Frank Lautenberg are alumni of Nutley High.

The median household income in 2013 was \$71,132, which was 1 percent higher than the statewide median of \$70,165. The 2013 median home value in Nutley was \$340,981, which was 11 percent higher than the statewide median of \$307,700.⁴³

At Nutley High in 2014, 12 percent of students were classified as socio-economically disadvantaged. Community reviews of Nutley are largely positive, with one parent writing in 2014 that the school has, “Very

good college prep program, great sports program and their music program is excellent as well.”⁴⁴ Yet, the SAT results at the school indicate that college preparation may not be as good as parents think.

In 2014, 86 percent of eligible students took the SAT, and 65 percent of those test takers failed to score at or above 1550. The average schoolwide SAT score was 1460.

Hunterdon County

South Hunterdon Regional High School is located in the Delaware River town of Lambertville, which had a 2010 population of 3,906.

Fourteen percent of students at South Hunterdon Regional High were classified as socio-economically disadvantaged in 2014, and nearly all eligible students, 97 percent, took the SAT. However, a majority of those test takers, 51 percent, failed to score at or above 1550. The schoolwide SAT average score was 1583.

Middlesex County

At Monroe Township High School is located in Monroe Township, which had a 2010 population of 39,132—a 40-percent increase over the population in 2000. Former New York Jets cornerback Randy Beverly, star of the Jets’ 1969 Super Bowl victory, lives in Monroe Township.

Eleven percent of students at Monroe Township High were classified as socio-economically disadvantaged in 2014, and 81 percent of eligible students took the SAT. However, a majority of those test takers, 51 percent, failed to score at or above 1550. The schoolwide average SAT score was 1565.

Monmouth County

Shore Regional High School is located in West Long Branch, which had a 2013 population of 8,509. The school’s famous alumni include Fred Schneider, frontman and founding member of the The B-52’s rock band, and Boston Red Sox manager John Farrell, who was a star pitcher for Shore Regional High.

The 2013 median household income in West Long Branch, which is 25 miles outside Brooklyn, was \$84,632, which was 21 percent higher than the statewide median of \$70,165. The median home value in 2013 was \$402,075, which was 31 percent higher than the statewide median of \$307,700.⁴⁵

Only a tiny 3 percent of students were classified as socio-economically disadvantaged at Shore Regional High School in 2014, and 88 percent of eligible students took the SAT. Yet, a surprisingly substantial 57 percent of these test takers failed to score at or above 1550. The average schoolwide SAT score was 1527.

Manalapan High School is located in Manalapan Township, which had a 2010 population of 38,872, which was a 16-percent increase over the population in 2000. Major League Baseball outfielder David DeJesus, who played for the Chicago Cubs and other teams, played baseball for Manalapan High.

Seven percent of students at Manalapan Township High were classified as socio-economically disadvantaged in 2014, and 89 percent of eligible students took the SAT. Yet, half of those test takers, 50 percent, failed to score at or above 1550. The schoolwide average SAT score was 1569.

Morris County

Jefferson Township High School is located in Oak Ridge, which is an unincorporated area of Jefferson Township. Jefferson Township had a 2010 population of 21,314. Derek Drymon, one of the creators of the hugely successful *SpongeBob Square Pants* animated series, graduated from Jefferson Township High School.

Twelve percent of Jefferson Township High students were classified as socio-economically disadvantaged in 2014, and 83 percent of eligible students took the SAT. A large proportion of these test takers, 61 percent, failed to score at or above 1550. The schoolwide SAT average score was 1474.

Butler High School is located in Butler, which had a 2013 population of 7,618. The median household income in Butler in 2013 was \$85,684, which was 22 percent higher than the statewide median of \$70,165. The median home value in 2013 was \$330,798, which was 7 percent higher than the statewide median of \$307,700.⁴⁶

Seventeen percent of Butler High students were classified as socio-economically disadvantaged in 2014, and 89 percent of eligible students took the SAT. Like at Jefferson Township High, 61 percent of Butler High test takers failed to score at or above 1550. The schoolwide average score was 1482.

Passaic County

Pompton Lakes High School is located in the borough of Pompton Lakes, which had a 2013 population of 11,148. The late Michael Weiner, executive director of the Major League Baseball Players Association, went to Pompton Lakes High.

The median household income in Pompton Lakes in 2013 was \$94,019, which was 34 percent higher than the statewide median of \$70,165. The median home value in the borough in 2013 was \$309,301, which was just a half-percent higher than the statewide median of \$307,700.

Eleven percent of Pompton Lakes High students were classified as socio-economically disadvantaged in 2014, and 87 percent of eligible students took the SAT. A large proportion of those test takers, 56 percent, failed to score at or above 1550. The schoolwide average SAT score was 1529.

Lakeland Regional High School is located in the borough of Wanaque, which had a 2013 population of 11,208. Professional boxing champion Bobby Czyz and NFL linebacker Fred Strickland attended Lakeland Regional High. Czyz graduated sixth in his high school class.

The median household income in Wanaque in 2013 was \$92,042, which was 31 percent higher than the statewide median of \$70,165. The median home value in the borough in 2013 was \$296,724, which was 4 percent lower than the statewide median of \$307,700.⁴⁷

Eleven percent of students at Lakeland Regional High School were classified as socio-economically disadvantaged in 2014, and 85 percent of eligible students took the SAT. A majority of those test takers, 52 percent, failed to score at or above 1550. The schoolwide average SAT score was 1538.

Salem County

Woodstown High School is in the borough of Woodstown, which had a 2013 population of 3,482. The median household income in Woodstown in 2013 was \$68,849, which was 2 percent lower than the statewide median of \$70,165. The median home value in the borough was \$221,627, which was 28 percent lower than the statewide median of \$307,700.⁴⁸

Roughly two out of 10 students at Woodstown High, 21 percent, were classified as socio-economically disadvantaged in 2014, and 81 percent took the SAT. A majority of these test takers, 52 percent, failed to score at or above 1550. The schoolwide average SAT score was 1532.

Union County

Arthur L. Johnson High School is located in Clark, which had a 2010 population of 14,756. NASA Space Shuttle astronaut Kenneth Ham attended Arthur L. Johnson High.

The median household income in Clark in 2013 was \$75,892, which was 8 percent higher than the statewide median of \$70,165. The 2013 median home value was \$403,705, which was 31 percent higher than the statewide median.⁴⁹

Only 6 percent of students at Arthur L. Johnson High were classified as socio-economically disadvantaged in 2014, and 91 percent took the SAT. Yet, a whopping 62 percent of test takers failed to score at or above 1550. The schoolwide average SAT score was 1497.

Jonathan Dayton High School is located in Springfield Township, which had 2010 population of 15,817.

Thirteen percent of students at Jonathan Dayton High School were classified as socio-economically disadvantaged in 2014, and 90 percent of eligible students took the SAT. A majority of these test takers, 52 percent, failed to score at or above 1550. The schoolwide average SAT score was 1502.

Are New Jersey Students Prepared for College?

The result of this widespread lack of college preparedness, according to Laura Waters, is the massive need for remedial instruction for students entering higher education:

According to the data, thirty-two percent of students entering the state's four-year colleges require remediation; that is, they are not adequately prepared for basic college courses and have to take remedial courses. Seventy percent of students entering our two-year community colleges require remediation. "Lack of readiness for college," states a brief from the National Center for Public Policy and Higher Education "is a major culprit in low graduation rates, as the majority of students who begin in remedial courses never complete their college degrees."⁵⁰

In her article, Waters quotes Casey Crabill, president of Raritan Valley Community College in Branchburg, New Jersey, who described his incoming class in these discouraging words:

They are ill prepared, and they don't know it. You spend six months in remedial education trying to convince them that this really will help. For many of them, it is discouraging.⁵¹

No wonder, then, that Waters says, "Perhaps it's time for a suburban version of education reform."⁵²

Conclusions and Recommendations

What this paper has shown is that on a number of indicators, many New Jersey students from non-low-income families have achievement issues. Also, a significant number of New Jersey high schools with predominantly non-low-income student populations are not preparing students for probable success in college.

On the NAEP exams, significant proportions of non-low-income New Jersey students fail to perform at the proficient level. Also, New Jersey trails top-performing Massachusetts in the proportion of non-low-income students performing at proficiency on the NAEP.

However, because New Jersey's 2014 state exams produced inflated proficiency rates vis-a-vis proficiency rates on the NAEP exams, few schools with predominantly non-low-income student populations meet this study's criterion for underperformance -- at least half or more of their students in a grade level failing to achieve proficiency on a state math or reading test. Again, as *The New York Times* pointed out, the 2014 New Jersey exams were "easier tests."

On the other hand, looking at high schools with predominantly non-low-income student populations, significant percentages of students at these schools fail to score at or above the College Board's College and Career Readiness Benchmark of 1550 on the SAT.

Out of the 194 public high schools in New Jersey that had predominantly non-low-income student populations, 114 met the state target of 80 percent or more of eligible students taking the SAT. Out of these 114 schools, 32 schools -- nearly three out of 10 -- had half or more of their SAT takers fail to score at or above the college-readiness benchmark of 1550.

Given the contrast between high-school scores on the state exams and the SAT, it appears that many students and their parents are being lulled into a false sense of satisfaction regarding achievement at middle-class high schools.

Given the contrast between high-school scores on the state exams and the SAT, it appears that many students and their parents are being lulled into a false sense of satisfaction regarding achievement at middle-class high schools. As New Jersey education writer Laura Waters notes, "surely we can agree that we need to raise our expectations for our children and that a high-school diploma should signify proficiency and readiness for college and career paths."⁵³

If parents are dissatisfied with their local public school, there are few government-funded school-choice options available in New Jersey. The state has an Interdistrict Public School Choice Program, which allows some public school students to transfer across district lines to other public schools. However, the number of students taking advantage of this program is only around 5,000, and even at that relatively low number state officials have signaled that the program has reached its maximum capacity.⁵⁴

New Jersey has a limited number of charter schools, which are independent local public schools that operate under a charter granted by the state commissioner of education. The New Jersey Department of Education is the sole charter school authorizer in the state. While New Jersey has 2,505 public schools, as of 2013-14, the state has only 87 charter schools.

In his 2015 State of the State address, Governor Chris Christie said, “Let’s give parents and students more choice.”⁵⁵ However, his statement was in reference to students who attend chronically failing public schools, which, as this study points out, may not be so easy to pick out, at least based on the proficiency rates produced under the NJ ASK and HSPA.

It is no secret that many middle-class parents decide to locate to certain neighborhoods because they think that the local public schools are high performing and will benefit their children. Former Harvard Law professor and current U.S. Senator Elizabeth Warren and her daughter Amelia Warren Tyagi have written that the major reason middle-class families are willing to shell out so much of their incomes on housing is that “when a family buys a house, it buys much more than shelter from rain”; rather, it “buys a public-school system.” They note, “For most middle-class parents, ensuring that their children get a decent education means buying a home in a small subset of well-reputed school districts.”

Warren and Tyagi advise: “Any policy that loosens the ironclad relationship between location-location-location and school-school-school would eliminate the need for parents to pay an inflated price for a home just because it happens to lie with the boundaries of a desirable school district.”⁵⁶ Such a policy would “relieve parents from the terrible choice of leaving their kids in lousy schools or bankrupting themselves to escape those schools.”⁵⁷

Toby Young, who has written a book on free schools, which are the British version of U.S. charter schools, has pointed out that many middle-class schools in Britain are underperforming. Yet, in many areas in Britain, like in New Jersey, there is only one government-run public school for miles around “so the only choice is to plump for the local school or go private.”⁵⁸ Given the cost of private education, Young says:

For middle-income or low-income families, that isn’t any choice at all. It’s the lack of any competition that enables these “sink” middle-class schools to “muddle through.” After all, the vast majority of parents in the surrounding areas will have no choice but to send their children to these schools, regardless of how poorly they perform.⁵⁹

For middle-class parents, who have gone into debt to buy into “good” neighborhoods with “good” public schools, what are they to do when they find out that the schools are not as good as they thought they were? The answer is to consider and support school-choice programs that are not just targeted at small groups of low-income families, but that give parents of all or most income levels the ability to choose the public or private school that best meets the needs of their children.

For besieged middle-class parents, Warren and Tyagi recommended, “A well-designed voucher program would fit the bill neatly.”⁶⁰ As *The New Yorker* has pointed out, Warren supports public-school vouchers, where parents could send their children to any public school.⁶¹

There is support among some New Jersey lawmakers for school-choice vouchers for private schools, which would essentially provide government-funded scholarships to parents and their children, who could then use the scholarships to attend private schools. State Senator Thomas Kean, Jr., a Republican, has sponsored a voucher/opportunity scholarship bill, which has the support of Governor Christie, but not the majority of the legislature.⁶²

Senator Kean’s bill, the Opportunity Scholarship Act, would allow low-income parents in a small number of designated school districts to receive scholarships to send their children to another school, including pri-

vate ones. Those donating to the fund from which the scholarships would be drawn would receive an equal tax credit.⁶³ Some Democrats have supported versions of Kean’s bill in the past, but the current Democrat leadership in the legislature signaled their opposition to the bill after Gov. Christie openly supported it in his 2015 State of the State.⁶⁴

While there is no doubt that many low-income students in New Jersey are attending underperforming public schools and would benefit from wider school choice options, indicators such as NAEP scores show that significant numbers of non-low-income students could also benefit from greater school choice as well. Some states have recognized this reality and have instituted more universal school-choice programs.

Many low-income students in New Jersey are attending underperforming public schools and would benefit from wider school choice options.

Tax Credits

Tax credit programs that allow individuals to claim tax credits for educational expenses, such as private-school tuition, can offer middle-class parents an immediate way to escape underperforming public schools and send their children to more suitable private schools. Such tax credits can also help parents afford tutoring and other assistance if switching to another school is not possible.

According to Jason Bedrick of the Cato Institute and Lindsey Burke of the Heritage Foundation, tax-credit laws have a “perfect record of constitutionality thus far.” In 2011, the U.S. Supreme Court rejected a challenge to Arizona’s tax-credit law because the funds did not become public money since they had “not come into the tax collector’s hands.”⁶⁵

A previous study in this “Not as Good as You Think” series, which focused on Illinois, highlighted that state’s tax credit program. According to The Friedman Foundation’s description of the Illinois program:

Parents receive a tax credit worth 25 percent of their expenditures after the first \$250, up to a maximum credit of \$500 per family. To get the maximum \$500 credit, parents must spend \$2,250 on educational expenses; they must also have a state tax liability of at least \$500 because the credit is nonrefundable and thus cannot reduce an individual’s tax burden to less than zero.

Educational expenses must be for students who are residents of Illinois, who are younger than 21, and have attended kindergarten through 12th grade in a public or private school in Illinois or were homeschooled.⁶⁶

The great aspect of the Illinois educational tax-credit program is that it is available to all Illinois taxpayers regardless of income level. Yet, as The Friedman Foundation points out, the program is hampered by some key shortcomings:

Illinois’ individual tax credit could be one of the country’s most effective choice programs if it made some updates. On student eligibility, the program is accessible to all students statewide. Moreover, there are no unreasonable regulations placed on private schools. Those strong features are hurt, however, by the fact that participants have very little funding

power with a maximum available credit of just \$500. Illinois could improve this program dramatically by raising the tax credit allowance to at least the state's average per-pupil expenditure in public schools and providing a refundable credit (similar to Alabama) so that low-income families can participate.⁶⁷

If the value of the Illinois tax credit was raised, many more parents, including middle-class parents, could take advantage of the program and send their children to private schools that better meet their needs. An Illinois-style tax-credit program, with a higher credit level, is something that New Jersey policymakers should consider.

Another type of tax-credit program would give taxpayers a dollar-for-dollar tax credit for money they donate to a nonprofit organization that then offered scholarships to students to attend private schools. Thus, a person with a \$1,000 state tax bill, who makes a \$400 donation to a scholarship organization, would see his or her tax bill reduced to \$600. Seven of the 17 tax-credit scholarship programs in the country provide a dollar-for-dollar 100 percent credit for all donations.

Arizona's Original Individual Income Tax Credit Scholarship Program gives a dollar-for-dollar tax credit to taxpayers who contribute to scholarship tuition organizations (STOs) that provide students with private-school scholarships. Individual taxpayers may claim a credit up to \$535, while married taxpayers filing jointly can claim a credit up to \$1,070.

Although the STOs must consider student financial need when awarding scholarships, all Arizona K-12 students are eligible to apply for the scholarships. The Friedman Foundation observes:

Arizona's individual tax-credit scholarship program is one of the most universal programs in the nation. It does not restrict eligibility based on arbitrary family income levels, prior public school enrollment status, or any other factor. Every school choice program should provide those opportunities.⁶⁸

The latest 2013 statistics show that 25,720 scholarships were awarded during that year, with an average scholarship amount of \$1,927.⁶⁹

The Arizona tax credit program is a bigger more all-encompassing version of Sen. Kean's proposal. Given the number of non-low-income students who are underperforming in New Jersey, state lawmakers should consider the merits of the larger Arizona program.

Education Savings Accounts

An education savings account program, according to the Friedman Foundation, "allows parents to withdraw their children from public, district, or charter schools and receive a portion of their public funding deposited into an account with defined, but multiple, uses, including private school tuition, online education, private tutoring, or future educational expenses."⁷⁰

Jason Bedrick and Lindsey Burke have written that ESAs have two important advantages over school-choice vouchers:

In addition to being able to direct ESA funds to multiple providers and products, parents can save unused funds from year to year and roll the funds into a college savings account.

These two features of ESAs — the ability of parents to completely customize their child’s education and save for future educational expenses — make them distinct from and improvements upon traditional school vouchers. Parents have the ability to maximize the value their children get from their education services, and, because they control how and when the money is spent, they have a greater incentive to control costs, too.⁷¹

In June 2015, Nevada Governor Brian Sandoval signed groundbreaking first-in-the-nation legislation that will make education savings accounts (ESAs) available to all parents and their children.⁷²

Under Nevada’s new program, for parents earning above the low-income level, the state will deposit funds, totaling 90 percent of the average statewide support per pupil, or roughly \$5,100, into ESAs starting next year. For parents earning below the low-income level or who have children with special needs, the state will deposit 100 percent of the average statewide support per pupil, around \$5,700, into parents’ ESAs. Parents can then withdraw funds from their ESAs to pay for a variety of educational services such as private-school tuition, distance-learning online programs, and tutoring. Any funds that are not spent in a school year will be allowed to roll over year to year until the student is no longer eligible to be enrolled in a public school.⁷³

The universality of Nevada’s ESA program sets it apart from all other ESA efforts. Glenn Cook, a senior editorial writer at the *Las Vegas Review-Journal*, has written:

ESAs exist in Arizona, Florida, Tennessee and Mississippi, but they place restrictions on eligibility. Across the country, parents only gain the power of choice based on their income or whether their child’s school performs poorly. Nevada’s ESA law only requires that students first be enrolled in public school to take advantage.⁷⁴

As opposed to many other states, which have so-called Blaine amendments in their state constitutions that prevent taxpayer dollars from supporting religious institutions, the New Jersey state constitution does not contain such an amendment. The state’s constitution does have a so-called “compelled support” clause that prevents the use of tax dollars to support churches or clergy. However, according to one analysis:

Both tax credit programs and vouchers are school choice options for New Jersey. Its Constitution does not contain a Blaine Amendment, and its Compelled Support Clause, while receiving little judicial attention, does not appear to preclude the use of funds other than those allotted for the public schools to support educational vouchers.⁷⁵

Thus, because of its “clean” state constitution, New Jersey lawmakers should consider universal ESA programs like Nevada’s.

School-Choice Vouchers

Indiana has enacted its Choice Scholarship Program, which makes school-choice scholarships available to many non-low-income parents. In addition to students who qualify for the National School Lunch Program, who are eligible for a voucher worth up to 90 percent of the state per-pupil spending amount for the district in which the students live, students “from families earning 150 percent of that same threshold can receive a voucher worth up to 50 percent of the state funding allocation for the sending district.”⁷⁶ Parents can use the state-funded voucher to pay for private-school tuition.

It is estimated that 42 percent of Indiana families meet the eligibility requirements of the Indiana program. While the Indiana program is an improvement over other school-choice programs that focus exclusively on low-income families, the Friedman Foundation for Educational Choice says, “the income eligibility level [for the Indiana program] is too low for higher income families to participate.”⁷⁷

The Bottom Line

Giving all parents, regardless of their income level, the opportunity to choose the best education for their children makes sense because many middle-class parents, struggling from paycheck to paycheck to make ends meet, don’t have the resources to afford private-school tuition or tutoring services.

In the end, the important point is that parents and the public realize that many middle-class students in New Jersey may not be achieving as well as New Jerseyans think they are. As New Jersey education writer Laura Waters says:

Certainly, if our schools are fine we don’t have to change. If they’re not but we pretend they are, then we are doing our children a disservice.⁷⁸

In other words, if New Jersey’s predominantly non-low-income public schools are as good as their proficiency rates on state tests make them appear to be, then they have nothing to fear from more universal school-choice options – parents and their children will stay put. However, if NAEP and SAT scores indicate that there are performance issues at these schools, then more universal choice options will offer middle-class children an immediate avenue to a possibly better education. The lesson for everyone is that choice is a right for all, not just for some.

- 72 Not surprisingly, the American Civil Liberties Union has filed a lawsuit to try and prevent the implementation of the Nevada ESA program. For an analysis of the ACLU lawsuit, see Tim Keller, “ACLU’s ESA lawsuit relies on anti-religion provision in Nevada’s constitution,” October 17, 2015, *Las Vegas Review-Journal*, available at <http://www.reviewjournal.com/opinion/aclus-esa-lawsuit-relies-anti-religion-provision-nevada-constitution>
- 73 According to the Friedman Foundation for Educational Choice, the following are the main regulations that the Nevada ESA program imposes:
- Existing licensed or exempt private schools are allowed to participate. Distance learning programs that are not offered by the public school, a tutor or tutoring agency, a university, state college or community college within the Nevada system of Higher Education, or a parent who has submitted an application to the state treasurer are also allowed to participate. The treasurer may request additional information to demonstrate that each may serve as a participating entity. The treasurer will establish those rules. From there, each entity can be approved or denied by the treasurer.
 - If any entity receives more than \$50,000 in ESA funds during any school year, the entity must post a surety bond equal to the amount received, or it must demonstrate to the treasurer the ability to pay with unencumbered funds. Receipts must be given for payment for all services rendered to the child.

- No entity will be allowed to refund or rebate any payment back to a parent.
- All children must complete a nationally norm-referenced test yearly in mathematics and English and report the results to the Nevada Department of Education (DOE). The DOE will then aggregate the data according to grade level, gender, race, and family income level. After three years, the DOE will report ESA student graduation rates.
- The treasurer may refuse to allow any entity to continue to participate in the program if they determine that the entity has failed to comply with any provision of the legislation.
- The treasurer’s office will make a list of participating entities annually. Additionally, the treasurer will be allowed to freeze or dissolve any accounts for noncompliance by any parent and may give notice for any account of fraud to the Attorney General or district attorney.
- Unless otherwise stated in the legislation, nothing in the legislation will be deemed to limit the independence or autonomy of any participating entity.
- The treasurer shall adopt any regulations necessary to carry out provisions of this act.
- All Nevada public school students who have been enrolled for at least 100 days prior are eligible to receive an ESA. That translates to roughly 93 percent of all Nevada school-aged children or 453,024 K–12 students. Children who received an ESA in the previous year are allowed continuing eligibility. Private and homeschool students are not eligible for the program.

HOW TO READ THE TABLES

Median Home Value

The median home value in the zip code in which the school is located.

% Low-Income

The percentage of economically disadvantaged students in the school. The study only includes schools in which 33 percent or fewer of the students qualify for the National School Lunch Program (NSLP).

ELA % Prof./Math % Prof.

The percentage of students that scored proficient or above on the NJ ASK or HSPA in English language arts/reading or math in 2014.

School SAT Average Score

The 2014 average composite SAT score for all students who took the SAT at that particular high school.

Percentage of SAT Takers Over 1550

The percentage of students taking the SAT at that particular high school who scored at or above the SAT's college-readiness benchmark score of 1550 in 2014. Research by the College Board shows a 65 percent likelihood of achieving a B- average or higher during the first year of college if a student scores at least a 1550 on the SAT, which in turn indicates a high likelihood of college success and completion.

School Percentage Taking the SAT

The percentage of students at the particular high school who took the SAT in 2014. The state target is 80 percent of students at a particular high school taking the SAT.

ABOUT THE AUTHORS

LANCET IZUMI, J.D.

Lance Izumi is Koret Senior Fellow and Senior Director of Education Studies at the Pacific Research Institute. He is the author of the 2012 book *Obama's Education Takeover* (Encounter Books), which details the centralization of education policymaking in Washington under President Obama.

He is the co-author of the book *Short-Circuited: The Challenges Facing the Online Learning Revolution in California* (first and second editions) and is the executive producer and narrator of a short film based on the book. He co-authored the 2015 PRI book *Moonshots in Education*, which analyzes digital education in America.

Mr. Izumi is the co-author of the groundbreaking book *Not as Good as You Think: Why the Middle Class Needs School Choice* and co-executive producer of the award-winning PBS-broadcast film documentary *Not as Good As You Think: The Myth of the Middle Class School*. He is the principal co-author of PRI studies examining the underperformance of middle-class students in Illinois, Texas, Michigan and Colorado. He also appears in Academy Award-winning director Davis Guggenheim's acclaimed film documentary *Waiting for Superman*.

He is also the co-author of the 2005 PRI book *Free to Learn: Lesson from Model Charter Schools*, which was used as a guidebook by New Orleans officials after Hurricane Katrina. He has also authored numerous PRI studies and reports, plus innumerable op-ed pieces in top U.S. and international publications.

From 2004 to 2015, Mr. Izumi served as a member of the Board of Governors of the California Community Colleges, the largest system of higher education in the nation, and served two terms as Board president. In 2015, Mr. Izumi was elected chair of the board of directors of the Foundation for California Community Colleges, which is the official non-profit supporting the California Community College system.

In 2008, *The New York Times* selected Lance Izumi as one of its online contributors on the presidential race and education issues. In 2009, *The New York Times* posted *Sweden's Choice*, a short film on Sweden's universal school-choice system, which he wrote and narrated.

Mr. Izumi served as chief speechwriter and director of writing and research for California Governor George Deukmejian. He also served in the administration of President Ronald Reagan as speechwriter to United States Attorney General Edwin Meese III.

He served five years as a commissioned officer (captain, Public Affairs Office) in the California State Military Reserve. Among his decorations, he received the commendation medal and the achievement ribbon.

Mr. Izumi received his juris doctorate from the University of Southern California School of Law. He received his master of arts in political science from the University of California at Davis and his bachelor of arts in economics and history from the University of California at Los Angeles.

ALICIA CHANG, Ph.D.

Alicia Chang is a cognitive and developmental psychologist (Ph.D., UCLA), specializing in cognitive and language development and applications of cognitive science to STEM education. Since completing her doctorate and postdoctoral research fellowships at the University of Pittsburgh and the University of Delaware, Alicia has been working in the field of education technology. She lives and works in the San Francisco Bay Area, and serves as a researcher at the Pacific Research Institute.

ABOUT PRI

The Pacific Research Institute (PRI) champions freedom, opportunity, and personal responsibility by advancing free-market policy solutions. It provides practical solutions for the policy issues that impact the daily lives of all Americans, and demonstrates why the free market is more effective than the government at providing the important results we all seek: good schools, quality health care, a clean environment, and a robust economy.

Founded in 1979 and based in San Francisco, PRI is a non-profit, non-partisan organization supported by private contributions. Its activities include publications, public events, media commentary, community leadership, legislative testimony, and academic outreach.

Education Studies

PRI works to restore to all parents the basic right to choose the best educational opportunities for their children. Through research and grassroots outreach, PRI promotes parental choice in education, high academic standards, teacher quality, charter schools, and school-finance reform.

Business and Economic Studies

PRI shows how the entrepreneurial spirit—the engine of economic growth and opportunity—is stifled by onerous taxes, regulations, and lawsuits. It advances policy reforms that promote a robust economy, consumer choice, and innovation.

Health Care Studies

PRI demonstrates why a single-payer Canadian model would be detrimental to the health care of all Americans. It proposes market-based reforms that would improve affordability, access, quality, and consumer choice.

Environmental Studies

PRI reveals the dramatic and long-term trend toward a cleaner, healthier environment. It also examines and promotes the essential ingredients for abundant resources and environmental quality: property rights, markets, local action, and private initiative.

The Laffer Center at Pacific Research Institute

Founded in 2012, The Laffer Center at the Pacific Research Institute is dedicated to preserving and promoting the core tenets of supply-side economics. The Laffer Center is named after Arthur B. Laffer, one of the nation's leading economic minds and considered by many to be the "Father of Supply-Side Economics." The Laffer Center houses Dr. Laffer's life's work and seeks to be the leading source for supply-side research and thought.
